

COMPRESSED AIR VACUUM: whenever electricity is unavailable or forbidden.

The A17 is the father of the compressed air vacuum range. This model is equipped with a powerful external Venturi system that guarantees excellent performance levels both in terms of waterlift and airflow. It can be used to recover solid debris and liquid spills. Two bins available: 60 and 100 l

A17 exists in two versions: 60 l or 100 l capacity bin. Both the small and large containers are equipped with wheels and a practical release mechanism which simplifies all emptying operations. With a robust trolley and large castors it's optimal for use even on bumpy surfaces. This unit can be made painted or stainless steel, as well as in a flameproof ATEX-compliant version (for zones Gas 1-2 and Dust 21-22).. Filtration is provided by the main bag filter fitted inside the filter chamber, with a total filtering surface of 19,500 cm². Whenever absolute filtration is required, a HEPA filter is available. The unit is also equipped with a standard manual filter shaker. Pneumatic filter shaker can be fitted upon request. The A17 is always equipped with a pressure gauge

PRODUCT FACTS

- Two versions available: 60 l bin and 100 l bin
- Standard manual filter shaker
- Pressure gauge
- Ideal for integration with automatic machines
- Continuous duty (24/7)
- Stainless steel version available
- Upstream HEPA filter available
- Flameproof ATEX version (for zones Gas 1
- 2 and Dust 21
- 22) available
