ATTIX 7

wet and dry vacuum cleaner *

Ergonomic Design

The machine can be moved around in an easy and comfortable manner - even when full. The robust steel chassis also provides practical storage for extension tubes and accessories.

Cable hook and accessory storage

Have everything to hand and store in a tidy fashion.

Silent Operation

The low working noise level makes this machine the quietest in its class. A luxury feature for a comfortable working environment.

PET Coated Filter

Suitable for wet and dry without the need for change. Made from a PET material making it virtually indestructible. 99.95% efficient, keeping the dust inside the vacuum where it belongs!

Superior suction performance

The twin turbine motor produces enough air flow and suction power to give you a better result in less time.

Softstart (760 versions)

A gentle motor start up to keep the current low and prevents voltage irregularities.

Speed governor (760 versions)

To control suction power and noise level and prevent sanders sticking to the working surface when dust extracting.

Versatile Container Handling

The container either tilts or can be lifted off the frame for quick and easy emptying or cleaning. It also has a drain hose fitted for controlled disposal of liquid waste.

Filter Cleaning (760 versions)

XtremeClean system works while you work to maintain un-interrupted full suction performance. See below for further details.

ED Model (Easy Disposal)

This is a dry only model where the waste is dumped directly into a sturdy disposal bag.

230 and 110 volt versions available on all models except the ATTIX 763-21 ED 230 volt only

FILTER CLEANING SYSTEM

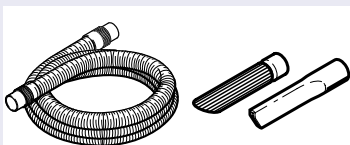

The XtremeClean technology is based on a valve controlled principle, using the air flow to clean one half of the filter cartridge - despite still working with the other half. The dirt is blasted off the filter and the suction performance is always maintained.

EASY DISPOSAL SYSTEM

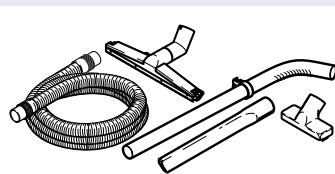

Quickly change the bag instead of having to empty a container.

OPTIONAL ACCESSORIES (see product catalogue for further accessories)

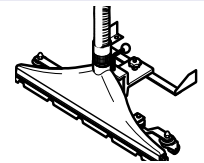

Standard accessory set - 6085

Industrial set - 63216

Disposal bag - 302001480 (for 751-11 and 751-21)

Large rolling nozzle-3020001481 with brush strips - 7993
