SOL series: singlephase and threephase for solids, oils and liquids

SOL 2000 and SOL 3000

SOL 3 and SOL 5W

SOL series: essential, powerful and efficient

A perfect combination of power, performance and environment protection, Nilfisk-CFM SOL series is the point of reference in industrial vacuum cleaning. Composed by two singlephase (2 and 3 kW) and two threephase models (2.2 and 4kW), the SOL series can collect solids, oils and liquids, so it is employed in the mechanical production because it can satisfy all the requests of the sector: general cleaning as well as recovery of powder, shavings, oils and liquids.

The advantages of using a SOL vacuum

SOL models are ideal in countless applications: from general daily cleaning of production areas to recovery of any kind of solid debris and liquid spills.

- In the metalworking industry, they are used above all to clean working machines, especially for the simultaneous recovery of shavings and oil.
- thanks to the large filter surface, SOL models can collect large quantities of fine dust. The filter can be rapidly cleaned by using the manual shaker-filter fitted on the vacuum head.
- The wide range of accessories together with their flexibility and adaptability, make SOL models suitable for a number of production needs.
- By using the original Nilfisk-CFM accessories, you can collect materials, even with a specific weight, from the floor or from any other surface, without clogging or damaging the suction hose.
- Thanks to their manoeuvrability, the compact size and the extra long electric cable, SOL models can easily reach any area of the company.

- For the machine tools Nilfisk-CFM has expressly designed specific accessories. suitable not only for cleaning but also for a quick maintenance of parts which, in the long term, get worn by shavings and oil.
 - SOL models offer all the traditional quality features of Nilfisk-CFM industrial vacuums. For any further information, please call our toll free number 800-236772.
- In conclusion, the SOL models help you work quicker, with more safety and in a healthier environment.
