

Health&Safety Wet&Dry vacuum cleaners for ATEX Type 22 explosive dust in Zone 22

If you are working in an ATEX Type-22 explosive dust environment, you will find the perfect Wet & Dry solution here. Choose from many different container sizes and performance levels, all with features that will enhance your working efficiency and minimize your operating costs.

ATTIX 7 features a 70 l stainless steel container that can be tilted or lifted off the chassis for emptying. Mobility and durability are ensured with the robust steel chassis and large wheels, while operating efficiency is enhanced with the Automatic Start/Stop feature.

SQ8 is a mobile 2-Motor vacuum powerful enough for the most demanding tasks, and equipped with Automatic Start/Stop for high operating efficiency.

TURBO D delivers very high air volume in a mobile vacuum configuration, and the 3-phase motor delivers the extended lifetime you expect in an industrial vacuum.

DYNAMICS are truly Industrial vacuums, and can easily be configured for remote control operation as a stationary vacuum connected to a fixed piping system.

Two models are available... the 440 with one turbine, or the 840 with two turbines, ideal for use with multiple operators. Delivering airflow as high as 12.900 l/m, consider the Dynamics for your stationary vacuum requirements.

PRODUCT FACTS

- Approved for work in ATEX Type 22 environments with explosive dust.
- Industrial performance, robust construction, and loaded with useful features to maximize your efficiency and minimize your costs.
- Brushless, long life motors for top performance and durability.
- Automatic Start/Stop for electric tools connected to the machine is available on many models.
- High capacity containers for big jobs.
- A full range of Type 22 accessories are available to tailor your machine to your application.
