

THE ZORRO

The Zorro

The Zorro is our new 4-batten wave sail, designed for onshore and real-world waves. It's a collaboration between David Ezzy on Maui and José Fernandez in Tenerife. The Zorro thrives in everyday conditions — the kind most of us actually sail in. It keeps its speed and drive through messy sections, then goes instantly neutral when you start surfing, giving you total freedom on the wave.

The Zorro Design

- Compact outline that turns on a dime
- Stable and balanced for high jumps
- Large window for clear wave vision

Performance and versatility

The Zorro accelerates fast and feels alive in your hands. It drives steadily and confidently through onshore waves and jumps, yet goes neutral the moment you need it to — perfect for flowing turns and smooth transitions.

Zorro vs. Ezzy Wave

The Zorro feels compact and a bit stiffer, with a constant drive that shines in onshore wave sailing and jumping.

The Ezzy Wave, on the other hand, has a more locked-in, controlled feel — ideal for side-shore or bump-and-jump sailing.

Ezzy Quality

Like every Ezzy sail, the Zorro is built to last.

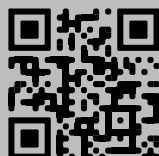

It uses Dyneema X-Ply, lightweight scrims, and our bombproof sleeve cloth. And every Zorro is rigged and tuned in our factory so it rigs perfectly right out of the bag.

RIGGING SPECIFICATIONS ZORRO 2026

SIZE	LUFF		BOOM		EZZY MAST	Battens	Weight
